Nation Without Borders

We are a group of friends and activists that established Nation without Borders in 2060 with hopes of reaching out to people who have been forced to flee their homes.

We are a collective that advocates for the rights and safety of displaced peoples.

We organize journeys and accompany migrants and refugees to ensure their safety on these trips.

We aspire to raise awareness about the dangers the current political climate on both sides of the border (Canada and US) have on displaced peoples.

We dream of a future where communities are bridged by unity and not divided by walls.
